

Project Name:

Team# 47

Test Date: 04/12/2025

Name(s) of Testers: Seif Otefa

Test Description: Testing SearchMoviesByGenre.java functionality

Indicate where are you storing the tests (what file) and the name of the method/functions being used.

Automated: ☐ yes ☐

Results: Pass

Preconditions for Test:

- DataManager preloaded with 5 movies
- Genre lists contain multiple and single-genre entries
- SearchMoviesByGenre instantiated with test scanner

Files:

SearchMoviesByGenreTest.java (to test go in milestone2/src and run java ./SearchMoviesByGenreTest

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Valid Genre	Search "Action"	Returns 2 matching movies	As expected	
2	No results	Search "Fantasy"	Returns empty list	As expected	
3	Case Insensitivity	"comedy", "COMEDY", "CoMeDy"	All return same result	As expected	
4	Multiple Matches	"Drama" → 2 movies	Correct movies returned	As expected	
5	Empty Genre	" "	Returns empty	As expected	
6	Whitespace Genre	" "	Returns empty	As expected	
7	Partial Match	"Act"	Returns empty	As expected	
8	Trimmed Input	" Horror "	Returns trimmed match	As expected	

9	Genre Validation	Search “Sci-Fi”	All returned movies contain genre	As expected	
10	Special Characters	“Sci-Fi”	Hyphen recognized correctly	As expected	

Post condition(s) for Test: Search filtering works

- Input sanitization verified
- Case-insensitive and trimmed-search logic validated
- Test Description: Testing RateMovie.java functionality

Preconditions for Test:

- DataManager has empty ratings map
- RateMovie created with input scanner
- System clock accessible

Files:

RateMoviesTest.java (to test go in milestone2/src and run java .RateMoviesTest.java

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	New Rating	Add rating for MovieID 1	Rating stored	As expected	
2	Update Rating	MovieID 2: 3 → 4	Overwritten successfully	As expected	
3	Rating Range	Ratings 1–5 accepted	Valid values stored	As expected	
4	Timestamp	Assigned “2025-12-03”	Stored correctly	As expected	
5	Multiple Ratings	Movies 1–3 rated	All stored in map	As expected	
6	Null Handling	Insert null	System ignores / no crash	As expected	
7	Retrieve Rating	Query MovieID 2	Returns updated value	As expected	
8	Rating + Timestamp Update	Old → new	Both fields reflect update	As expected	

			Map size = 3	As expected	
9	Map Integrity	3 ratings added			
10	Setter Methods	Set & get rating/timestamp	Correct values returned	As expected	
11	Persistence	Ratings remain in DataManager	Data accessible	As expected	
12	Overwrite Logic	Movie rated twice	Only latest stored	As expected	

Post condition(s) for Test:

- Rating logic validated
- Update & overwrite functionality confirmed
- No illegal values accepted
- Fully ready for CLI integration
